## READING LINNKS

Office of Superintendent of Public Instruction Old Capitol Building
P.O. Box 47200

Olympia, Wasfington 98504-7200
(360) 725-6035-smccune@ospi.wednet.edu

This project was supported by the United $S$ tates $\mathcal{D e}$ partment of Education, grants R3032010044A and R3032000037. The information or opinions expressed do not necessarily reflect the opinions or policies of the U.S. Department of Education.

## The LINXKS Project

The mission of the $\mathcal{L I N} \mathcal{N} K S$ project is to develop educationalmulti-media products that can support schoolimprovement and educational reform. The project has focused on the development of a we bsite and the development of we 6 assisted professional development programs.

Reading $\mathcal{L I} \mathcal{N} K S$ is a multi-media program that provides information and mode ls ways that scientific reading research may be incorporated in classroom instruction. Reading $\mathcal{L I N} \mathcal{N K S}$ began with the filming of te achers demonstrating the five components of reading instruction included in the Report of the $\mathcal{N}$ (ational Reading Panel $(\mathcal{N} \mathcal{R} P)$. These include phonemic awareness instruction, phonics instruction, fluency instruction, voc abulary instruction, and comprefension instruction. Re ading $\mathcal{L I N} \mathcal{N} K$ was expanded to include early orallanguage de velopment, English language le arners, turning a school around, and strategic change. A total of 18 le ssons are provide d on the $\mathcal{L I N} \mathcal{N} K S$ we 6site (www.linksle arning.org) as well as on CDs.

Reading $\mathcal{L I} \mathcal{N} \mathcal{K} S$ also includes eight training modules and partic ipant materials that can be used in three to six fiour workshops at schools, districts, regionalor state conferences or meetings. The information provided in the lessons endeavors to provide teachers, administrators, parents, and citizens with information about ways reading research can be used to increase children's reading skills.

The LINNKS project partnered with teachers and staff from Waskington Alliance of Schools to highlight the importance, complexity, and elegance of effective te aching and le arning.

These teachers along with a reading consultant and a $\operatorname{Scottsdale,~Arizona~te~acher~}$ are featured in the vide os. They demonstrate a we alth of reading knowle dge, skills in curriculum design, instruction and assessment, as well as an obvious concern and caring for the children they teach.

The LINNKS project wishes to express its appreciation to the Washington Alliance that played a major role in the Reading LINXS project, the teachers who were filmed, and the teachers who participated in field-testing and evaluation.

In addition staff from the Longvie $w$, Washington $S$ chool District and teachers from Waskington Alfiance districts have provided valuable feedback and suggestions.

It is our hope that the electronic and print Reading $\mathcal{L I N} \mathcal{N} \mathcal{S}$ materials will provide information and models for ne w te achers, will stimulate discussion and experimentation with experienced te achers, and be usefulin ensuring that allchildrenle arn to re ad and read well by the end of third grade and to continue the ir reading skills development throughout the ir schoolexperience.

## $\mathfrak{N O T E S}$ TO THE FACILITATOR

Before beginning a Reading Links training session, ple ase read the "I ips to Facilitating the Reading Links Modules". It is found in the back of this manual under tab 10, "Tips to Facilitating". It outlines the essentials for conducting a successfultraining session. The sections "Equipment and Materials,""Introducing Yourself and Participants," and "Workshop Expectations" are particularly useful, because they describe fow to begin a session. "Room Arrangement"may also be反е โpful.
The Agend a opposite this page is written as a generic guide to a Reading Links training session. Before you begin, personalize the top portion by adding the date, times, location, and module to the training you will be delivering. This can also be adapted to serve as an advertisement or flyer.
Materials to gather before beginning Fluency:

1. The Report of the National Reading Panel-find this downloadable document at www.nationalre ading panel.org.,
2. Put Reading First: The Research Building Blocks for Teaching Children to Read -also downloadable at www.nifl.gov.,
3. 6 copies of Good-Bye Round Robin: 25 Effective OralReading Strategies by Opitz and Rasinski (or 1 for each group of participants),
4. A vide o or audio of a student orally reading, and
5. Severaldifferent published samples of informalreading inventories.

## $S$ UPPO RI MATERI ALS

O $\mathcal{H} / P P I$ \# 1: Fluency

OH/PPI \# 2: Agenda

## SESSION ACTIVITIES

Introductions

1. Dis play $O \mathcal{H} / P P I$ \# 1 and welcome the participants to your training.
2. Introduce yourself and describe your background and experience in education.
3. Have participants do a nametag or tent according to your preference.
4. Introductory activities for participants are outlined in the "Iips" document. Choose one according to how well the participants knowe ach other, fow much time is allotted for the training, and how many people are present.
5. Walk throught the Agenda, connecting the information to the times and particular module you are delivering.

# READING LINKS $\mathcal{A G E N D A}$

## $\mathfrak{N O T E S}$ TO THE FACILITATOR

The opposite page provides the participants with an overall understanding of the Reading Links project and how it fits into the Links Learning We 6 site. Be sure to read it carefully before beginning your training session in order to answer questions as they arise. There is no need to fave your participants read it. Your overview of the contents will be sufficient.

A $\mathcal{F A Q}$ about these materials is, "How can a school or district use them?" Along with the Reading Links overview, tell the participants why the materials were developed and guide them to finding the best use for the ir school or district if needed. This is often decided by the Director of Curriculum or Building Principal. Here is a list of suggested purposes:

1. To explain the scientific basis of teaching cfildren to read using teacher-friendly materials.
2. To connect the evidence to classroom practice.
3. To explain assessment choices that matcfinstruction of the module.
4. To provide additional support to scfools/districts so they can critically evaluate the ir curriculum.
5. To provide le aders with a resource for further observation and study.
6. Continuing with the Overview of the training, explain the Reading Links project to the participants, fighlighting frow it began and what it is being used for in our state.
7. Suggest the above list as a tool to help scfiool or district personnel focus the ir use of the materials.

Als o available at: www.linksle arning.com
$\mathfrak{N O T E S}$ TO $\mathcal{T H E} \mathcal{F A C I L I T A T O R}$
The manuals are written using an advanced organizer known as ROPES. It stands for Review, Overview, Presentation, Engagement and Practice, and Summary. Each section fas a purpose to the ove rall training session and content of the manual. Go over the ROPES structure with the participants, pointing out the purpose each section serves in felping them learn new material. Note the acronym and connect it to the manual's tabs. For example, the purpose of "R" or Review is to activate the participant's prior Knowledge, provide entry learnings, and focus the session. Continue to go througheach ROPES acronym, purpose, and connection to the manual. The pages that hold the information are then found under the Presentation tab. $\mathcal{B e}$ sure to credit $\operatorname{Dr}$. Robert Carkfuff for its development. You may wish to use this power point slide as you introduce each new section during your training. Put this $O \mathcal{H} / P P I$ up on the overfead projector as an advanced organizer.

## $S$ UPPO RT MATERI ALS

O $\mathcal{H} /$ PPPI \# 3: ROTES : $\mathcal{A}$ Guiding Structure

## SESSION $\mathcal{A C T I V I T I E S}$

1. Explain the ROPES structure to the participants, outlining what each section's purpose is to the training session.
2. Highlight the acronym.
3. Connect each section of ROPES to the tabs on the participant's manual. Have them locate each one.
4. The footer indicates the current section of ROPES with the use of capitals.

ROPES: A GUIDING STRUCTURE FOR LEARNING

## $\mathcal{F L U E N} \mathcal{N}$

SECTION 1: REVIEW
$\mathfrak{N O T E S} \mathcal{T O} \mathcal{T H E} \mathcal{F A C I L I T A T O R}$
The activities on this page serve two purposes. For the participants, it activates their background knowle dge of $\mathcal{F l u e n c y}$. For you, these activities help you assess your participants'previous Knowledge. Ulse it to gain information in order to alter your session accordingly. For example, after the participants have marked the continuum, note where most of the ir $X$ 's fell. If your participants have answered 1', monitor the following 4 Square activity closely. How well can the participants define fluency? Do they fave valid ide as for classroom instruction? If their answe rs are vague, incorrect, or absent, go through "Presentation" carefully and stop more frequently in order to provide time to share new understandings with each other and ask questions.

## $S \mathcal{U P P O ~ R I ~ M A T E R I ~ A L S ~}$

Blank Overfeads
OH projector markers

OH/PPI \# 4: Think-Ink-Pair Share

## SESSION $\mathcal{A C T I V I T I E S}$

1. Ask the participants to rate the ir familiarity with $\mathcal{F}$ fuency on the ir own by marking an " $x$ " on the continuum.
2. Think-Ink: Next, the participants answer each of the 4 questions.
3. Pair-S hare: Participants talk in small groups or partners about their answers.
4. On 6lank overfeads, have the participants summarize the group's answers and share on the front projector.
```

\end{tabular}

\section*{\(\mathfrak{N O T E S} \mathcal{T O} \mathcal{T H E} \mathcal{F A C I L I T A T O R}\)}

This page builds on the discussion from the initial \(4 S\) quare activity. Be sure to tie in the participants'previous answers with the additional information on the page.

This page is important because it helps participants understand the characteristics of fluent reading. Discuss eacf bullet and provide examples.

\section*{\(S \mathcal{U P P O} \mathcal{R T} \mathcal{M A T} \mathcal{E} R I \mathcal{A} \mathcal{L}\)}

\section*{SESSION ACTIVITIES}

O \(\mathcal{H} / \mathcal{P P I}\) \# 5: What is
Fluency?
1. Summarize the information on the overfiead.
2. Empfasize that fluency includes speed, accuracy, and proper expression and that it can be performed without conscious attention.
3. Review the characteristics of fluent readers. They recognize words automatically and group words quickly to help them gain meaning from what they read.
```

F\&UEENCY

## What Is Fluency?

Fluency is

- reading with speed, accuracy and proper expression
- without conscious attention
- while simultaneously constructing meaning

Children who are fluent readers can

- recognize words automatically
- group words quickly to help them
gain meaning from what they read, and
- read aloud effortlessly and with expression

## $\mathfrak{N O T E S} \mathcal{T O} \mathcal{T H E} \mathcal{F A C I L I T A T O R}$

The purpose of this information is to create the " $\mathcal{D}$ " or dissatisfaction in the formula $\mathcal{D} \not \subset \mathcal{V} \mathcal{F} x S>R C$ found in the "Tips for Facilitating" module. Revie w the sections "Dealing with Change" and "Formula for Helping Te achers Change"; if you haven't already, for a full explanation.
$S \mathcal{U P P O} \mathcal{R T} \mathcal{M A T E R I \mathcal { A } \mathcal { L }}$

O $\mathcal{H} /$ PPI \# 6: Why Has
Fluency Been $\mathcal{N e g l e c t e d , ~}$ Underemphasized, and Ignored?

## SESSION $\mathcal{A C T I V I T I E S}$

1. Read these statements out loud.
2. Ask participants if they agree and have them give other reasons why fluency fias not been given more attention.
```
F&\mathcal{UENSCY}

Why Has Fluency Been \(\mathcal{N e g l e c t e d , ~}\) Underemphasize, and Ignored?

Fluency fins been labeled the most
- neglected reading skill
- under-emphasized aspect of reading instruction
because both researchers and practitioners assumed that fluency was the immediate result of word recognition proficiency.
\(\mathfrak{N O T E S}\) TO \(\mathcal{T H E} \mathcal{F A C I L I T A T O R}\)

The important element to emphasize is the connection between fluency and comprefension. While fluency doesn't ensure comprefinsion, comprefension is difficult without fluency.

\section*{S UPPO RT MATERI A \(\mathcal{L S}\)}

OH/PPI \# 7: Why Is It
Important for \(S\) tudents to
Be Fluent Readers?

\section*{SESSION \(\mathcal{A C T I V I T I E S}\)}
1. Read through the overfiead.
2. Empfrasize the connection betwe en fluency and comprefension. Ask questions such as the following:
- What connections are you making?
- Do these connections make sense to you?
- Howdo these facts relate to what you have experienced as a classroom teacher?

\section*{Why Is It Important for Students to} Be Fluent Readers?

The \(\mathcal{N} \mathcal{A E P}\) assessment results for fourth graders indicated a figh correlation between accuracy, rate, fluency, and scores on comprefension. Low scores in fluency may meandifficulty in comprefension.

The National Reading Panel (2000) concluded that there is a close relationsfip between fluency and comprefension.

\title{
\(\underline{O V E R V I E W} \mathcal{N O T E S}\)
}

\section*{\(\mp-\infty-\infty-\infty-\infty-\infty-\infty\)}

\section*{\(\mathcal{F L U E N} \mathcal{N}\)}

SECTION 2: OVERVIEW
\(\mathfrak{N O T E S}\) TO THE FACILITATOR
This begins Section 2: Overview in the manual.

\section*{\(S\) UPPO RT MATERI ALS}
\(O \mathcal{H} /\) PPI \# 8: Key Learning Goals

\section*{SESSION ACTIVITIES}

Key Learning Goals
1. Read through each of the goals, emphasizing the main ide a of each one such as 'connect,' 'Cearn, model, and teach,' 'Ce arn to assess,' and 'create an action plan.' Be sure to note that the third bullet is the classroom application portion that provides the practical instruction piece to the training.
2. Explain that the goals pertain to the session as well as the manual.

\section*{Key Learning Goals}

The Participants will:
- Understand the connection betwe en fluency and reading development-especially as it relates to comprefiension.
- Learn the differences between fluency and automaticity.
- Learn, model, and teach research-based strategies for fluency instruction in the classroom.
- Learn to assess students'levelof fluency, practice instructional strategies, and explore appropriate interventions.
- Create an action plan to apply key le arnings from this module to the ir classroom practice.

\section*{\(\mathfrak{N O T E S}\) TO THE FACILITATOR}

The "Building \(\mathcal{B}\) locks for \(\mathcal{T}\) eaching Children to Read" are the five major reading components included in the report of the \(\mathcal{N}\) ational Reading Panel. The Reading Links project has figflighted the five essential components in teaching cfildren to read as outlined in the Report of the \(\mathcal{N}\) ational Reading Pane l. However, Reading Links also acknowle dges that the job is larger than that. Therefore, other components of a student's reading growth such as Oral Language \(\mathcal{D e}\) velopment, Connecting Re ading and Writing and \(\mathcal{E L L}\) instruction are also included. There are manuals and training sessions to cover the other major reading components.

\section*{\(S \mathcal{U P P O} \mathcal{R I} \mathcal{M A \mathcal { A } E R I \mathcal { A } \mathcal { L }}\)}

\section*{SESSION ACTIVITIES}

Materials: Put Reading First document

Building Blocks
1. Show the Put Reading First document to the participants.
2. Discuss its link to The Report of the \(\mathcal{N} \mathcal{R P}\) as an instructional vie w of the evidence.
3. This grapfic explains the "blocks" for teaching cfildren to read as outline d in Put Reading First.
4. Explain that by participating in the Reading Links training sessions, participants are receiving the research-based and classroom applications for each of the \(\operatorname{PR\mathcal {F}}\) and \(\mathcal{N} \mathcal{R P} 5\) major components as well as others.

\title{
Building Blocks for Teacfing Children to Read
}

Vocabulary
Development

\section*{\(\mathfrak{N O T E S} \mathcal{T O} \mathcal{T H E} \mathcal{F A C I L I T A T O R}\)}

Explain the 3 essential elements of fluency (e.g., accuracy, rate, and expression). \(\mathcal{A}\) reader needs all three in order to be fluent. The multi-tasking element means that many things fiappen in a fluent reader's mind all at once. The four tasks are processing, automaticity, pacing, and phrasing. These are fappening rapidly and without the reader giving conscious thought to them. Automaticity is an automatic level of word identific ation that means the reader processes a word with little effort or attention. A fluent reader must have the words from the text in sfort-term memory in order to understand the ir meaning. Cross checking is when a reader confirms or "checks" that the words read make sense in the selection. This is fappening continuously as the fluent reader reads.

\section*{\(S \mathcal{U P P O} \mathcal{R T} \mathcal{M A T E R I \mathcal { A } \mathcal { L }}\)}

\section*{SESSIOX ACTIVITIES}

O \(\mathcal{H} /\) PPPI \# 10: Flue ncy
Fluency
1. Show the chart.
2. Explain that Fluency is composed of three essential elements (accuracy, rate, and expression). A fluent reader does all three. Another word for expression is appropriate phrasing or chunking of words.
3. Explain the reader's efforts to continually cross check while reading.
4. Refer to the glossary where the fluency terms on this page are explained in Section 8 .

SECTION 3: PRESENTATION

\section*{\(\mathfrak{N O T E S}\) TO THE \(\mathcal{F A C I L I T A T O R}\)}

This begins Section 3: Presentation of the manual.

The eye and the ear symbols on this page are used in the Pfonemic Awareness and Phonics manuals in helping participants recognize proficient reader characteristics. Some of these bullets were discussed in the fluency graphic. New to the participants at this time is the rapid use of punctuation and the determination of where to place emphasis or where to pause.

\section*{\(S \mathcal{U P P O} \mathcal{R T} \mathcal{M A \mathcal { A } E R I \mathcal { A } S}\)}

\section*{\(\mathcal{S E S S I O N} \mathcal{A C T I V I T I E S}\)}

O \(\mathcal{H} /\) PPP \# 11: What Does OralReading Fluency Look and Sound Like?
1. Review the first four bulle \(t s\) thoroughly.
2. Empfrasize the last two as new le arning in this training.

Oral reading fluency is characterized by
- Smootf, expressive production
- Appropriate pfrasing or chunking
- Rapid use of punctuation
- Determination of where to place emphasis or where to pause to make sense of text

This is a very important page. It reemphasizes this ide a that to be fluent, students must be reading quickly, accurately and yet with appropriate grouping of words.

\section*{\(S \mathcal{U P P O} \mathcal{R T} \mathcal{M A T E R I \mathcal { A } \mathcal { L }}\)}

O \(\mathcal{H} /\) PPI \# 12: Why is Fluency
Important?

\section*{\(\mathcal{S E S S I O \mathcal { A } C T I V I T I E S}\)}

Explain
1. Discuss each bullet and paragraph.
2. The last paragraph explains what is possibly frappening when a reader is not fluent.
```

F\&\mathcal{UENSCY}

```

\section*{Why Is Ffuency Important?}

Fluency is important because it provides a bridge between word recognition and comprefension.

While fluency doesn't ensure comprefension, comprefiension is difficult without fluency. To comprefiend texts, students must be able to:
- decode fast enough and automatic ally enough
- Keep the content in short term memory so that meaning can be constructed.

If a reader is stopping constantly to decode and figure out unknown words, the likelifood is that
- meaning will be disrupted or
- the process will become long and laborious

\section*{\(\mathfrak{N O T E S} \mathcal{T O} \mathcal{T H E} \mathcal{F A C I L I T A T O R}\)}

Show the Report of the National Reading Panel again. Explain that in every module we have summarized the \(\mathcal{N}\) RP's findings regarding that building block of reading. Ulsually, it is a long list of bullets. In fluency, however, there is one clear finding that canguide a teacher's instruction. Guided repeated oral reading is the classroom practice that most effectively increases a student's fluency while reading. Section 4, Engagement and Practice, gives examples of guided repeated oral reading in classroom applications.

\section*{\(S\) UPPO RT MATERIALS}

\section*{SESSIO N ACTIVITIES}

O \(\mathcal{H} / P P \mathcal{I} \# 13:\) What are the
\(\mathcal{N}\) ational Re ading Pane l's
Findings about Fluency
Instruction?

Explain
1. Read the statement with confidence.
2. Yes, it is that simple!
3. Discuss the \(\mathcal{N} \mathcal{R P}\) as noted above.

\title{
What Are the \(\mathcal{N a t i o n a l}\) Reading Panel's Findings about Fluency Instruction?
}

> Fluency instruction is most effective when it includes guided repeated oral reading.

\section*{\(\mathfrak{N O T E S}\) TO THE \(\mathcal{F A C I L I T A T O R}\)}

The first bullet refers to \(\operatorname{Sustained~Silent~Reading~(SSR)~or~} \mathcal{D}\) rop Everything and Read ( \(\mathcal{D E A R}\) ) time. This is saying that although silent reading may be beneficial to students in other areas, fluency building is not one of them. Minimalspecial training is key to a teacher's success because the classroom practices in section 4 are not complicated. A teacher can train a paraprofessionals or parent helpers to help with fluency applications. However, the more a student struggles with reading, the more they require the help of a skilled teacher.

\section*{\(S\) UPPO RI MATERI ALS}

OH/PPP \# 14: What Did the \(\mathcal{N a t i o n a l}\) Re ading Panel
Report Say About Guided Repeated Oral Reading?

\section*{SESSIOX ACTIVITIES}

Explain
1. Summarize each bullet.
2. Give the participants the opportunity to discuss these findings in small or whole groups.

\title{
What Did the National Reading Panel Report Say About Guided Repeated Oral Reading?
}

The \(\mathfrak{N} \mathcal{R P}\) concluded that guided repeated oral reading:
- Is more effective than silent reading
- Has a significant positive impact on word recognition/accuracy, reading fluency, and comprefiension (with feedback)
- Clearly impacts the reading ability of non-impaired readers through at le ast grade 4, as well as students with various reading problems throughout figh school
- Works well under a wide variety of conditions and with minimal special training
- Is effective (when used with guidance and feedback) in improving a variety of reading skills for good readers, as well as those who are experiencing difficulties
- Is equally effective with feedbackfrom teachers, parents and/or peers; however, children who are struggling the most might bene fit from more skilled guidance.

\section*{\(\mathfrak{N O T E S} \mathcal{T O} \mathcal{T H E} \mathcal{F A C I L I T A T O R}\)}

Round Robin Reading refers to a common reading method where a teacher fias students take turns reading out loud. The students read their portion of the text 'cold,'sometimes Knowing when their turn is coming, other times by surprise. This practice does not increase fluency, nor is it an effective oral reading method. This page outlines the negative impact Round Robin reading fas on students. An "inaccurate view of reading" means that it gives students the impression that reading is a performance that cannot be refearsed. The psychological impact that embarrassment and anxiety fave around reading is strong. Some adults remember Round Robin Reading as a dreaded time of the day. You may want to askyour participants if they remember this practice. And if so, what their reactions were.

\section*{5 UPPO RT MATERI ALS}

OH/PPI \# 15: Why Isn't Round Robin Reading Effective to Ulse to \(\mathcal{D e v e l o p}\) Fluent Readers?

\section*{\(\mathcal{S E S S I O N} \mathcal{A C T I V I T I E S}\)}

\section*{Explain}
1. Read the question in the title.
2. Explain the Round Robin practice.
3. Emphasize its negative impact on le arning by reading the bulle \(t\).
4. Tell the participants that there are many effective methods for helping students build their fluency Gesides the Round Robin method.
5. Classroom applications that replace Round Robin Reading will be discussed in Section 4: Engagement and Practice.

Why Isn't Round Robin Reading an Effective Fluency Strategy?

Round Robin Reading
- Provides limited engagement
- Gives an inaccurate view of reading
- Promotes faulty reading frabits
- Invites inattention and disruption
- Gets in the way of effective strategies
- Consumes valuable classroom time that could be spent in more meaningful ways
- Causes anxiety and embarrassment
- Hampers listening comprefinsion

\section*{\(\mathfrak{N O T E S}\) TO THE \(\mathcal{F A C I L I T A T O R}\)}

Some participants may be confused at this time. It may seem that the National Reading Panel Report says that oralreading is important, and yet you just refuted the most common oralreading practice. Explain that it is still vital that students read orally in order to build fluency. This page gives nine reasons for this.

\section*{\(S \mathcal{U P P O ~ R T ~ M A T E R I ~ A \mathcal { L S }}\)}

O \(\mathcal{H} / P P \mathcal{I} \# 16: \mathcal{B u t}, \mathcal{W}\) fy is
OralReading Important?

\section*{SESSION ACTIVITIES}

Explain
1. Call attention to each bullet.
2. Explain that these reasons explain why oral reading practice (not Round Robin Reading) is important.
\(\mathcal{R} \mathcal{A} \mathcal{D} I \mathcal{N G} \quad \mathcal{L} \mathcal{N} \mathcal{K} S \quad \mathcal{P} \mathcal{A} \mathcal{R} \mathcal{T} \operatorname{C} I \mathcal{P} \mathcal{A} \mathcal{N} \mathcal{T}\) 'S \(\mathcal{M} \mathcal{A} \mathcal{N} \mathcal{U} \mathcal{A}\)

\section*{But Why Is Oral Reading Important?}

Oralreading is important because it:
- whets students'appetites for reading
- encourages students to share and perform
- demonstrates fowspeaking, reading and writing connect with one another and impact our lives
- develops listening, comprefiension and vocabulary
- assists students indeveloping a range of reading skills (eg., fluency, expression and correct pfrasing)
- promotes language le arning
- Guilds confidence
- provides cfildren with the additional reading time necessary for ongoing reading development
\(\mathfrak{N O T E S}\) TO \(\mathcal{T H E} \mathcal{F A C I L I T A T O \mathcal { R }}\)
These are the four essentialelements of effective fluency instruction.

5 UPPO RI MATERIALS

OH/PPT \# 17: What Does Effective Fluency
Instruction Include?

\section*{SESSION ACTIVITIES}

Explain
1. Summarize each bullet.
2. Explain the last bullet by
repfrasing the ide as next to the circles.
\(\mathcal{R} \mathcal{E} \mathcal{D} I \mathcal{N} \mathcal{G} \quad \mathcal{L} \mathcal{N} S \quad\) P \(\mathcal{A} \mathcal{T} I \mathcal{C} I P \mathcal{A} \mathcal{T}\) 'S \(\mathcal{M} \mathcal{A} \mathcal{N} \mathcal{A} L\)
What Does Effective \(\mathcal{F l u e n c y}\) Instruction Include?
- Ongoing assessment
- Modeling and explicit instruction
- Focus on automaticity and comprefension as goals
- Guided repeated reading experiences
- Word study
- Meaningful texts connected to students' instructional needs and interests
- Encouraging students to read more (using approaches such as \(\mathcal{S S} \mathcal{R}, \mathcal{D E A} \mathcal{R}, \mathcal{A c c}\) 位rated Reader) might be beneficial; however, existing research fas not yet demonstrated this in a clear and convincing manner.
- Although independent, recreational, sustained, silent reading, and programs such as \(\mathcal{A R}\) are not empirically supported to increase fluency, they may have instructional value in other areas.

This finallist of instructional considerations is described as 'challenges'to the teacher. This is a way of emphasizing their importance in the classroom.

\section*{\(S\) UPPO RT MATERI ALS}

OH/PPI \# 18: What Are The
Challenges for Teachers?

SESSION \(\mathcal{A C T I V I T I E S}\)

Explain
1. Discuss each bullet briefly.
2. Emphasize the \(4^{\text {th }}\) and \(5^{\text {th }}\) Gullets. These will be addressed in Section 4: Engagement and Practice.

\section*{What Are the Challenges for Teachers?}

Teachers need to:
- Understand, choose, model, and use varied te acfing and le arning strategies that show fluent reading is more than fast reading
- Design lessons requiring active participation
- Motivate students with energy, support, and positive reinforcement
- Matcfreading materials to students' instructional needs and interests
- Provide multiple opportunities for autfentic repeated reading experiences
- Ulse classroom management strategies (e.g., small groups, partner reading,) that increase each student's time on task.

\section*{\(\mathfrak{N O T E S}\) TO THE FACILITATOR}

The purpose of this activity is to give participants time to process the information they have just le arned. Because the "Presentation" section of the manuals provides the capacity building for the component, you can decide to use this at any appropriate time. Be aware of when the participants fiave 'rad enough'newinformation and need time to digest it. It is not necessary to fiave an \(O \mathcal{H}\) of the opposite page. Tell the participants which steps to follow. Be sure to watch a clock and explain when to switch turns.

Subsection 1: Classroom Strategies and Applications

Subsection 2: Assessment

Subsection 3: CD/Vide o Modeling

Subsection 4: Action Planning

## $\mathfrak{N O T E S}$ TO $\mathcal{T H E}$ FACILITATOR

In this section of the manual(Classroom Strategies and Applications), the re are many considerations for the facilitator. Not all of the Applications in the manual can be covered in your training session. Instead, you must choose which classroom strategies to model. Keep in mind that there are three opportunities for the participants to experience the strategies and applications - once in a whole group setting with your facilitation, again in small groups during $\operatorname{I}$ igsaw Teaching, and individually during Action Planning.

In order to decide how to train the whole group portion of the session, first review all the strategies in this section. Choose which ones best fit your training by considering the following:

- Background Knowledge level of the participants. It may be best to plan 1 or 2 activities under each category and adjust accordingly.
- Audience-Consider the grade range/levels when selecting which strategies and application to model.
- Staff development needs - The principal or contact person who fired you to do the training may have a particular need that he/she wants emphasized.
- Time allotment - Howmuch time is remaining? Have I followed the time frame laid out on the Agenda closely? Or fias discussion and questioning been heavy for this session? How much time does the activity take as a whole group? Can I describe some of the activities just as well as modelthem?
- Flexibility and adaptability - Most of the activities are fighly adaptable to many tasks. If you choose one of these adaptable activities, explain to the participants how it can be molded to many purposes.
- Engagement levelfor adults - Sometimes what is engaging for cfildren may not be engaging for adults. Choose applications you feeladults would like to do.
- Room set up and space available - Is there a space for all of the participants to participate comfortably and actively? Can you demonstrate a lesson using a small group when space doesn't allow for more?
- Materials and $S$ upplies $-\mathcal{B e}$ sure to revieweach application you plan on modeling. The materials needed to teach it may require addition supplies beyond the generic list in the "Iips for Training a Reading Links Module."

Use the subsequent 6 lank pages to make your own notes about which applications you chose to model, require materials, time frames, or other felpfulinformation.

```

SESSIONACTIVITIES

\section*{Guided Repeated Reading Experiences}

Application 1: Repeated Reading
This procedure involves rereading text (often self-selected) until it can be read accurately and fluently. It encourages the use of contextual meaning and sentence structure to predict upcoming words and to correct miscues.

Suggested Procedure:
The student chooses the text to be read (selection can be based on "leveled books"), or the teacher assigns a passage.
1. The teacher takes anecdotal notes or keeps a running record of miscues as well as rate of reading during the first reading of the text.
2. Progress is tracked on a chart or graph.
3. The student practices rereading the text orally or silently several times.
4. The student rereads the text for the teacher a second time, and the teacher once again takes anecdotal notes and/or running records (Uling a different colored penfelps to indic ate the student's growth between readings).
\(\mathcal{N O T E}:\) To support a cooperative learning approach, have students complete their repeated readings with partners.

Continue to use this space to record your training notes if you chose to demonstrate the application on the opposite page.

```

F\&UE\mathcal{NCY}

```

```

    Application 1: Repeated Reading (continued)
    ```
Variation:
OralPrevie wing

Suggested Procedures:
1. Begin by faving the student preview the text by first listening to an expert reader.
2. After listening to the expert fluent reader several times, the student reads the passage independently.
\(\mathcal{N O T E}\) : Rasinski (1990) found that oral previe wing and re pe ated readings are equally effective in improving fluency.

Continue to use this space to record your training notes if you chose to demonstrate the application on the opposite page.
\(S\) UPPO RT MATERI ALS
SESSIO \(\mathcal{N} \mathcal{A C T I V I T I E S}\)
```

F\&UE\mathcal{NCY}

```

\section*{Guided Repeated Reading Experiences}

Application 2: Neurological Impress Metfod ( \(\mathcal{N} I \mathcal{M})\)

In this approach, the teacher and the student read orally in unison. It might be felpfulto initiate this approach using short, rhythmic, and repetitive texts, such as poems or song lyrics.

Suggested Procedure:
1. Sit on the side of your student, so that you will be able to read into the student's ear.
2. Begin reading along with your student. Your voice may be a second or two ahe ad of the student's, especially if the student fias a limited sight vocabulary.
3. Modelfluent, expressive reading. Do not stop if the student falters.
4. Instruct the student to continue to read along -or slightly befind you-as much as possible.
5. Move your finger along the line of print so that the student can follow along more easily.
(Heckelman, 1969)

Continue to use this space to record your training notes if you chose to demonstrate the application on the opposite page.
\(S\) UPPO RI MATERI ALS
SESSION \(\mathcal{A C T I V I T I E S}\)
```

F\mathcal{U}E\mathcal{NCY}

```

\section*{Guided Repeated Reading Experiences}

Application 3: Ecfo Reading

This approach is similar to both the ne urological impress method and repeated reading procedures; it, too, involves teacher modeling and the student "approximating" or imitating the reading. It is recommended for students who focus too much on the words in a passage rather than on the meaning, or for those students who read without expression or attention to punctuation/other cues.

Suggested Procedure:
1. The teacher reads one sentence of text aloud with appropriate intonation and phrasing.
2. The student tries to imitate or repeat the text-and the reading of the text--as modeled.
3. The text reading continues in this manner until the teacher feels the student can imitate more than one sentence at a time.

Continue to use this space to record your training notes if you chose to demonstrate the application on the opposite page.

\(\mathcal{S E S S I O N} \mathcal{A C T I V I T I E S}\)
```

F\&UE\mathcal{NCY}

## Guided Repeated Reading Experiences

Application 4: Radio Reading

This procedure is for developing oralreading fluency in a group setting with students "acting" or reading texts (e.g., print media, ne wspapers, magazines or any print source that can be converted into a news story).

Suggested Procedures:

1. Only the reader and the teacher have copies of the script; the other students act as listeners.
2. Students refearse until they have gained confidence in their reading.
3. Unlike round robin reading where all mistakes are visible to anyone following along, this approach allows students to deviate from the text -and paraphrase - without embarrassment by stressing the ide a that their reading should make sense.

Continue to use this space to record your training notes if you chose to demonstrate the application on the opposite page.
$S$ UPPO RI MATERI ALS
SESSIO $\mathcal{N} \mathcal{A C T I V I T I E S}$

## Guided Repeated Reading Experiences

Application 5: Reader's Theater

This approach (like other approaches that involve performances or dramatic readings for others, e.g., strategy use performances, chamber theater, Wolf, 1994) provides a realistic opportunity for students to read orally and practice their use of intonation, inflection, and fluency. It is helpfulnot only for fluency, but also for comprefiension, because the students must decide fow to convey their interpretation of the text (through their oralreading/performance) to an audience.

Suggested Procedures:

1. Students select texts/tasks, or they are assigned parts/roles for a "performance."
2. Students practice reading the text and/or completing the task, getting help from others before the performance with unfamiliar words, phrasing, intonation, and expression.
3. Students read their scripts/texts or perform their tasks orally for an audience.
(Sloyer, 1982)
The following websites offer ideas for reader's theater:

SESSIONACTIVITIES

## Guided Repeated Reading Experiences

Application 6: Screen Readings of Captioned Programs
Captions we re first developed for hearing-impaired vie wers, but they can also be used for fluency instruction. Rereading captioned programs provides opportunities for students to practice reading that is entertaining and self-correcting.

Koskinen and her colle agues found that less fluent readers and Gifingual students become more motivated readers when they use captioned television and video, perthaps because of the multisensory processing involved.

Suggested Guidelines:

1. Choose programs related to literature and content-are a instruction as a pre-reading activity.
2. Introduce the program, reviewing vocabulary as needed.
3. Plan related activities to use after viewing the program.
4. Allow English language learners to view the program several times.
5. Create a text set of books and other related materials to use with the program.
6. Provide opportunities for students to review the program and read related texts.
(Koskinen, Wilson, Gambrell, \& Neuman, 1993; Tompkins, 2001)
For more information about captioned television programs and vide os, contact $\mathcal{T h e}$ $\mathcal{N}$ ational Captioning Institute at 1-800-533-WORD.

Continue to use this space to record your training notes if you chose to demonstrate the application on the opposite page.

SESSIONACIIVITIES

```
F&\mathcal{UENSCY}
```

## Guided Repeated Reading Experiences

## Application 7: Building Reading Rate

Some students read accurately, but slowly. One tecknique for building fluency rate is suggested by Carnine and Silbert (1979).

1. Select a passage on which the student is at least $90 \%$ accurate.
2. Establisf a base rate on a one-minute timing (words read per minute).
3. Set a target for the passage that is $20 \%-40 \%$ above the initial rate (e.g., if the student read $60 \mathrm{wpm} x .30$, the new target would be $60+18=78$ wpm).
4. Graph the target in the student's folder and have fim or her reread the passage as many times as necessary to reach the target on a one-minute timing.
5. Continue to increase the student's target 6y 20\%-40\% (on passages of similar difficulty) until the student's average rate reaches the established criterion for fis or her grade level(with accuracy maintained).
6. Once the criterion rate has been reached, the level of difficulty of the passage may be increased.

Continue to use this space to record your training notes if you chose to demonstrate the application on the opposite page.
$S$ UPPO RT MATERI ALS
SESSIONACTIVITIES

# Modeling and Explicit Instruction 

## Application 1: Oral Recitation Lesson

This approach has been recommended as a solid alternative to the traditional but ineffective practice of round robin reading (ReutzeleCooter, 2000; Reutzel \& Hollingsworth, 1993). It consists of two basic components (directinstruction and indirect instruction) with a series of subroutines.

Suggested Procedures:
I. Direct Instruction
A. Comprefinsion

1. Introduce a newselection (e.g., activating prior knowledge, predicting, making connections).
2. Read the selection aloud and lead the students in an analysis of the content (e.g., questions/answers, story features, connections, etc.)
3. Record student responses (e.g., chart, Goard, overfead, etc.).
B. Practice
4. Work with students to improve their oral reading expression by mode ling fluent reading with sections of the text.
5. Have students "approximate" your reading (e.g., use choral reading, unison reading, ecko reading, etc.).

Continue to use this space to record your training notes if you chose to demonstrate the application on the opposite page.
$S \mathcal{U P P O} \mathcal{R T} \mathcal{M A T E R I} \mathcal{A} \mathcal{L S}$
SESSIONACIIVITIES

## Application 1: OralRecitation Lesson(continued)

C. Performance

1. Have students select a text segment to perform for others in the group/class.
2. Encourage the listeners to comment positively on the performance.
II. Indirect Instruction
A. Fluency practice
3. Have students select a story or other text that they will practice reading until they become fluent or "expert."
4. Observe their reading (e.g., take anecdotal notes, running records, etc.).
5. He [p them to decide (self-assess) when they are ready to demonstrate or perform the ir fluent reading.
B. Demonstrating fluent (expert) reading
6. Have students perform the ir fluent reading in front of peer or parent audience.
7. Encourage the listeners to give positive feedback.

Continue to use this space to record your training notes if you chose to demonstrate the application on the opposite page.
$S$ UPPO RT MATERI ALS
$\mathcal{S E S S I O \mathcal { N } \mathcal { A C I I V I T I E S } \text { IT }}$

## Modeling and Explicit Instruction

## Application 2: Fluency Development Lesson

 read aloud, choral reading, listening to children read, and reading performance. It is meant to supplement other reading experiences and to promote meaningful reading, fluency, and word recognition. During the lesson, students listen to the teacher read a short text (e.g., a poem, a patterned story, or a portion of a text), read the text chorally, pair up and practice, and then perform the reading for an audience.

Procedures:

1. Prepare two copies of text per child and teacher as well as an overfiead transparency or 6 ig chart of the text.
2. Read the text several times while the students followalong ontheircopies.
3. Discuss the meaning of the text. Point out how reading with expression can enthance the meaning as well as entice others to listen.
4. Read the text chorally several times.
5. Pair the students with a partner or Guddy. Each student reads the text orally to fis/her partner at le ast three times with the listener giving positive feedback and help when needed. Circulate/observe their reading, noting which pairs appear to be ready to perform.

Continue to use this space to record your training notes if you chose to demonstrate the application on the opposite page.

## Application 3: Lookfor the Signals

Lookfor the Signals is a strategy that helps students to see fow punctuation and other typographical signals (e.g., punctuation marks, large and bold print, underlining, italics) affect meaning and help readers better understand an author's intended message.

| Signal | What It Conveys | Example |
| :---: | :---: | :---: |
| Comma | Need to pause <br> Placement affects me aning | Mary, my daughter is as tall as you. <br> Mary, my daughter, is as tall as you. |
| Period | Need a longer pause | The clouds looked strange. |
| Question mark | Need to raise <br> intonation at the end of <br> the sentence | Did you sle ep well last night? |
| Exclamation point | Need to read with a certain emotion | It was a wonderful party! |
| Underlined, <br> enlarged, bold or <br> italicized print | $\mathcal{N}$ (eed for special stress | This is what I said. <br> This is what I said. <br> This is what I said. |
| Combination | Ulsed to show meaningful units | The coach said, "I am SO proud of how all of you played this game!" |

Continue to use this space to record your training notes if you chose to demonstrate the application on the opposite page.
$S$ UPPO RT MATERI ALS
SESSIONACTIVITIES

## Application 3: Lookfor the Signals (continued)

Procedures:

1. Select specific text excerpts that students have already read or will be reading that correspond to the specific signals you will be teaching or emphasizing.
2. Enlarge the text excerpt on an overfiead transparency or chart paper or use big books that show the specific text.
3. Tell students that you will read the text twice and that you want them to listen to see which reading gives them the best ide a about the character or event. Ulse a monotone voice for the first reading. Reread the text using expression and all typograpfical signals. Discuss the differences in the readings with the students (e.g., Which reading interested you more? Did emphasizing different words and pausing at different times give you a better understanding of the author's message?). Point out the different typograpfical signals you used and fow these helped you to better convey the author's intended meaning.
4. Provide students with meaningful practice, reminding them to look for the signals when reading to themselves.
5. After the practice session, have students read aloud one or more sentences in which they used a typograpfical signal and explain what the signal indicated they needed to do.

Continue to use this space to record your training notes if you chose to demonstrate the application on the opposite page.

## Incorporating $\mathcal{M e}$ aningful $\mathcal{T e x t s}$

Application 1: Predictable Language
This method takes advantage of the rhythmic, repetitive language structures in children's literature and nursery rhymes (Walker, 1992). The assumption is that word identification is facilitated by the predictive nature of the text.

Suggested Procedures:

1. Select text that contains a predictable pattern.
2. Read the text aloud to students completely through, so they can fiear the whole story. Emphasize the predictable parts using an entfusiastic voice.
3. Read the text again, but this time ask the students to join in whenever they know the pattern.
4. During additional readings, you could use an oralcloze procedure to give students practice in predicting upcoming words.
5. Students can read the text on their own, using the predictable language patterns and picture clues to aid them.
6. An extension could be to askstudents to write their own predictable patternstory using the patternfrom the text read.
$\mathfrak{N O T E S}$ TO $\mathcal{T H E} \mathcal{F A C I L I T A T O R}$
Subsection 2: Assessment includes tips for administering oral reading fluency measures (e.g., materials, suggested procedures, marking, scoring, fluency probe development and a sample probe) and 4 different assessment tools. You could also have available several different published informal reading inventories for participants to review if they are unfamiliar with these assessment tools.

When presenting this subsection, do not showany bias toward or against any assessment procedure or tool. Instead, allow the participants to become familiar with each instrument, and to decide which procedure/toolfits their unique situation.

F&UENSCV

Subsection 2
Assessment
\(\mathfrak{N O T E S} \mathcal{T O} \mathcal{T H E} \mathcal{F A C I L I T A T O R}\)
Pages 37-43 include "Administering OralReading \(\mathcal{F}\) fuency Me as ures" and "Fluency Probe Development." Askyour participants if they have given an IRI, running record or miscue analysis. For participants who fave used any of these measures, the directions for the Oral Fluency Me asure will be a review. Of interest to them, in any case, are the Assessment Rate Goals. These numbers represent student targets for grades 2-5 for oral reading and accuracy.

\section*{\(S\) UPPO RT MATERI ALS}

Materials: Samples of
different informal reading inventories

SESSIONACTIVITIES

Revie wing \(\mathcal{A d m i n i s t r a t i o n ~ a n d ~ A s s e s s m e n t ~}\) Procedures
1. Ask the participants if they fave administered an \(I R I\), running record, or miscue analysis.
2. Based on the background Knowledge/needs of the participants, talk through, review, or explain in detail how to administer, mark, and score oral reading fluency measures.
\(\mathcal{R} \mathcal{E} \mathcal{A} I \mathfrak{N} G \quad L I \mathcal{N} \mathcal{K} S \quad \mathcal{P} \mathcal{R} \mathcal{T} I \mathcal{C} \mathcal{P} \mathcal{A} \mathcal{N} \mathcal{T} \mathcal{S} \quad \mathcal{M} \mathcal{A} \mathcal{N} \mathcal{U} \mathcal{A} L\)

\section*{Administering Oral Reading Fluency \(\mathcal{M e}\) asures}

\section*{Materials}
- Passage for the student to read (sometimes called a"probe") If the student is reading for practice, the probe may be used more than once. If the student is reading for assessment purposes, the probe must be secure and unpracticed.
- Administrator's Scoring Sheets You will need one for each student. You will be recording the rate and accuracy for each student on a separate sheet.
- Stopwatcfi or other timing device to determine one minute
\(\mathcal{N}\) ote: It is a good ide a to administer fluency assessments at a desk or table, rather than having the student just sit and hold the probe. Students are able to do better if their fiands are free for guiding or pointing.

\section*{Suggested Procedures:}
1. Introduce yourself (if you are not the student's teacher).
2. Say: "Hi, (name). I would like you to read a story out loud to me. Read it as quickly and as carefully as you can. I ust skip any words you do not know or cannot read. If youget to a word you do not Know and you are stuck, I Il say, 'Go on'and you should go on to the next word. At the end of one minute, I ll askyou to stop. I am going to take some notes wfile you are reading, so I can remember what you say. Do you understand what I want you to do?"
\(\mathcal{A d m i n i s t e r i n g ~ O r a l ~ R e a d i n g ~} \mathcal{F}\) fuency \(\operatorname{Me}\) asures (continued)

\title{
Administering Oral Reading Fluency Me asures (continued)
}
3. Then say: "Ihe title of this story is \(\qquad\) -
When you say your first word, I will start my stopwatch. You can start whenever you're ready."
4. Start the stopwatch when the student says the first word of the passage. If a student does not know a word, wait three seconds and say, "Go on." Do not give the student the word.
5. As the student reads, record any errors using a marking system.
6. At the end of one minute, make double slasf marks and tell the student he or she may stop reading. (Another option is to make the double slash marks at the end of one minute and le the student continue to the end of the passage, noting time used.)
\(\mathcal{N}\) ote: Depending on the purpose of the fluency timing (practice or assessment), you may want to discuss the student's errors with fim or her when the reading is completed.
\(\mathfrak{A d m i n i s t e r i n g ~ O r a l ~ R e a d i n g ~} \mathcal{F}\) fuency \(\operatorname{Me}\) asures (continued)
```

F\&\mathcal{USNSCY}
$\mathcal{R} \mathcal{A} \mathcal{D I} \mathcal{N G} L I \mathcal{N} \mathcal{K} S \quad \mathcal{P} \mathcal{R} \mathcal{T} I C I \mathcal{P} \mathcal{A} \mathcal{T}$ 'S $\mathcal{M} \mathcal{A} \mathcal{N} \mathcal{U} \mathcal{A}$

```

\title{
\(\mathcal{A d m i n i s t e r i n g ~ O r a l ~ R e a d i n g ~ F l u e n c y ~ M e ~ a s u r e s ~}\) (continued)
}

\section*{Marking}

Ulsing a uniform marking system is important because you want to be able to examine the probes over time and be able to quickly determine the kinds of errors the students are making. Kinowing the kinds of errors will inform your instruction.
- Count as Errors: Omissions, mispronunciations, substitutions, insertions

Circle any words the student omitted or those you told fim or fier to "skip."

Single slasf any words the student read incorrectly (either a mis pronunciation or a substitution). Above the error, write what the student actually said. ( \(\mathcal{N}\) ote: If a student mispronounces the same word in the same way more than one time; the errors are noted, 6 ut they count together as only one error.)

Record any inserted words above a caret (ヘ).
- Do \(\mathcal{N}\) (ot Count as Errors: Self-corrections, repeated words

Write SC above a word that was mispronounced, but then self. corrected.

Make a double underline beneath repeated words or phrases.
\(\mathcal{A d m i n i s t e r i n g ~ O r a l ~ R e a d i n g ~} \mathcal{F}\) fuency \(\operatorname{Me}\) asures (continued)

\title{
\(\mathcal{A d m i n i s t e r i n g ~ O r a l ~ R e a d i n g ~ F l u e n c y ~ M e ~ a s u r e s ~}\) (continued)
}

\section*{Scoring}

Determine the total number of words read.

Count the number of errors and subtract from the total.

The difference between the number of words read and the number of errors is the Words Correct per Minute (WCPM). This is the score that is recorded and graphed.
\(\mathfrak{N O T E S}\) TO \(\mathcal{T H E} \mathcal{F A C I L I T A T O R}\)
\(\mathcal{A l t h o u g h}\) there are many different informal reading inventories available on the market, teachers need to know how to develop fluency probes from basals or other texts being used in the classroom.

\section*{SESSION \(\mathcal{A C T I V I T I E S}\)}

Revie wing \(\mathcal{F l u e n c y ~ P r o b e ~ D e v e l o p m e n t ~}\)
1. Talk through, review, or explain in de tail how to develop fluency probes.
2. Refer to the selection on the next page as a sample probe taken from Open Court Colle ctions for Young Scholars, 2-1 (used with permission from the publisher).

\section*{Fluency Probe Development}

It is very useful and easy to develop fluency probes from basals or texts that are being used by the student in a grade level. Make sure the passage selected is at the correct level of difficulty for the student.
1. Select a passage of 110-120 words in length at the student's independent level. This passage should not have been read recently. (See sample on next page.)
2. Type the probe, le aving room on the right side to place word count numbers. Comic Sans and Century Gothic are both cle ar fonts that are easy for students to read. Make sure you record the basal or text you used, with the page number at the bottom of the page, along with the student name and date. This helps when documenting growth and/or recording student data.
3. Don't forget that you will need to run off two copies per session: one for the student to read from and one for recording the students'responses onto.
4. To start the teacher says:
"I am going to fave you read a passage aloud to me. Read it as best you can. I will not be able to help you, so if you come to a word or words you don't know, try your best and go on. After one minute I will stop you." Start the timer "as" the student reads the first word.
5. Have the student read the passage. As the student reads, record mistakes and words read correctly. S top the student after one minute.
6. One way to calculate a student's fluency is to take the totalnumber of words read in one minute and to subtract the errors.

Total words read in one minute \(\qquad\)
Subtract errors

 explains how to carry out this activity.

\section*{\(S\) UPPO RT MATERI ALS}

Optional Activity: If gigsaw is not used identify the fluency assessment tools provided and encourage further study and use of assessments.

Video or audio tape of a student orally reading

\section*{SESSIO \(\mathcal{N} \mathcal{A C T I V I T I E S}\)}

I igsaw Vie wing and Assessing
1. Identify the 4 assessment tools in this section.
2. Explain that the OSPI tool (\#2) has many pieces to it 6ut that in this session, we will be looking at only the "Phrasing" portion on the first page. Participants who wished to use it in the ir classroom, however, would be using this tool in its entirety.
3. Divide the whole group into 4 smaller groups. Assign each a different assessment tool.
4. Play the video or tape of a student orally reading.
5. Have each group use the ir assessment tool to mark the student's reading score.
6. As a whole group, have each tool group share how they assessed this student.
7. Compare the scores, and discuss the pros and cons of these tools.

\title{
ASSESS MENNT TOOL \# 1
}

\section*{\(\mathcal{N A E P}\) s OralReading Ffuency Scale}

Level4 Reads primarily in larger, meaningful phrase groups. Although some regressions, repetitions, and deviations from text may be present, these do not appear to detract from the overall structure of the story. Preservation of the author's syntax is consistent. Some or most of the story is read with expressive interpretation.

Level 3 Reads primarily in three-or four-word phrase groups. Some smaller groupings may be present. However, the majority of phrasing seems appropriate and preserves the syntax of the author. Little or no expressive interpretation is present.

Level2 Reads primarily in two-word phrases with some three-or four-word groupings. Some word-by-word reading may be present. Word groupings may seem awkward and unrelated to larger context of sentence or passage.

Level 1 Reads primarily word-by-word. Occasionaltwo-word or three-word phrases may occur but these are infrequent and/or they do not preserve meaningful syntax.

Assessment Tooljigsaw (continue d)
\(S\) UPPO RT MATERIALS
SESSIO N ACTIVITIES
```

F\&\mathcal{UENSCY}

```

Accuracy, Rate, and Pfrasing (OSPI \(2^{n d}\) Grade continued)

Accuracy is based on the totalnumber of words read (which varies depending on the passage) and the number of errors.

In order to convert the rawscore into a percentage, divide the number of words read correctly by the totalnumber of words in the passage.
\[
\begin{array}{ll} 
& \frac{\text { correctwords }}{\text { totalwords }}
\end{array}=\text { accuracy }
\]

Rate: Words per minute is computed based on the amount of time it takes the student to read the entire selection.
\(\frac{\text { \# words }}{\text { \# minutes }}=\) words per minute

Example: \(\quad \underline{165}\) words \(\quad=\quad 55\) words per minute 3 minutes
\[
153 \text { words }=61 \text { words per minute }
\]
2.5 minutes

Phrasing: the ability to read a passage accurately with the awareness of syntax and expression.

Assessment Tooljigsaw (continue d)

```

\section*{Combining Scores (OSPI \(2^{\text {nd }}\) Grade continued)}

Ule the Oral Reading Rubric for scoring. For each of the three maincategories in the matrix (i.e., accuracy, rate, and phrasing), choose the criterion that most closely matches the child's performance, and markthat 6ox. For instance, if the child's accuracy is 85 percent, mark the box with " \(85 \%\) or less" in it; if the child's rate is 35 words per minute, mark the 6 ox with " 31 39 "; and if the child's phrasing most closely matches the description for phrasing for " 1 ", mark the box with " 1 " in it.

Then add the three scores together. In the above example, the teacher adds \(1+2+1=4\). A score of 6 or Gelowindicates a child is "substantially belowgrade level."

> Assessment Tooljigsaw (continued)

Oral Reading Rubric (OSPI \(2^{\text {nd }}\) Grade continued)
\begin{tabular}{|c|c|c|c|}
\hline \multicolumn{2}{|r|}{Accuracy} & Rate & Pfrasing \\
\hline 1 & \(85 \%\) or fewer & \begin{tabular}{l}
30 or \\
fewer
\end{tabular} & \(\mathcal{A L L} \mathcal{W} O R \mathcal{D} \mathcal{B Y} \mathcal{W} O R \mathcal{D}\) \\
\hline 2 & 86-89\% & \[
\begin{aligned}
& 31-49 \\
& \text { words }
\end{aligned}
\] & \(\mathcal{M O S T L Y} \mathcal{W} O \mathcal{R D} \mathcal{B Y} \mathcal{W} O R \mathcal{D}\) \\
\hline 3 & 90-95\% & \[
\begin{aligned}
& 50-89 \\
& \text { words }
\end{aligned}
\] & \(\mathcal{M O S T L Y}\) PHRAS ING \\
\hline 4 & 96-100\% & \begin{tabular}{l}
90 or \\
more
\end{tabular} & LARGE MEAXINGGFUL PHRAS \(\mathcal{L S}\) \\
\hline
\end{tabular}

Determine the child's performance by combining the 3 scores. When using the retelling category, follow the same procedure, except add allfour scores together to get the totalscore. When retelling is included, a score of 8 or below places the student "substantially belowgrade level."

Total Scores for Accuracy, Rate and Phrasing
Score of 6 and below \(=\) "Substantially Below Grade Level"
Score of 7 or \(8=\) "Borderline range"
Score of 9 or above \(=\) "Satisfactory Progress"
Total Scores for Accuracy, Rate, Pfrasing and Retelling
Score of 8 and below \(=\) "Substantially Below Grade Level"
Score of 9-11 = "Borderline range"
Score of 12 or above \(\quad=\) Satisfactory Progress"

Retesting at a later date is required for "Substantially Below" students after appropriate classroom adaptations have been applied.

ASS ESS MENTI TOOL \# 3 \\ Rubric for Fluency Evaluation
}

Nonfluent Reading
- Word-by-word reading
- Frequent pauses between words (poor phrasing)
- Little recognition of syntax
- Little response to punctuation
- Some awkward word groupings

Beginning \(\mathcal{F}\) fuency
- Frequent word-6y-word reading
- Some two-and three-word phrasing
- May reread for problem solving or to clarify (strategic reading)
- Shows some awareness of syntax and punctuation

Transitional Fluency
- Combination of word-by-word reading and fluent phrase reading
- Some expressive pfrasing
- Shows attention to punctuation and syntax

Fluent Reading
- Fluent reading with very few word-by-word interruptions
- Reads mostly in larger meaningful phrases
- Reads with expression
- Attends consistently to punctuation
- Rereads as necessary to clarify or problem solve

Assessment Tool jigsaw (continued)

SESSION ACTIVITIES

\title{
\(\mathcal{A S S E S S} \operatorname{MEN} \mathcal{N} \mathcal{T O O L} \# 4\)
}

\section*{Multidimensional Fluency Scale}

Student's \(\mathcal{N}\) ame \(\qquad\) Date \(\qquad\)

Text \(\qquad\)

Directions: Ulse the scale in all three areas to rate reader fluency. Circle the number in eacf category that best corresponds to your observations.

Phrasing
1 Monotone with little sense of phrase boundaries; frequent word-by-word reading
2 Frequent two-and three-word phrases, giving the impression of choppy reading; improper stress and intonation that fails to markends of sentences and clauses
3 Mixture of run-ons, mid-sentence pauses for breath, and possibly some choppiness; reasonable stress/intonation
4 Generally well phrased, most in clause and sentence units with adequate attention to expression
Smootfiness
1 Frequent extended pauses, hesitations, false starts, sound-outs, repetitions, and/or multiple attempts
2 Several "rough spots"in text where extended pauses, hesitations, and so on, are more frequent and disruptive
3 Occasional breaks in smoothness caused by difficulties with specific words and/or text structures
4 Generally smooth reading with some breaks, but word and structure difficulties are resolved quickly, usually through self-corrections

\section*{Pacing}

1 S low and lab or ious
2 Moderately slow
3 Uneven mixture of fast and slow reading
4 Consistently conversational
(Zutell \& Rasinski, 1991 as cited in Opitz \& Rasinski, 1998)

\section*{\(\mathfrak{N O T E S}\) TO \(\mathcal{T H E}\) FACILITATOR}

The \(\mathcal{C D} /\) video modeling subsection is the time for participants to vie wa "real teacher" (not a simulated classroom or actor) demonstrating classroom application strategies from this module. Some of the CD/vide os are explicit teaching of strategies; some are models of a strategy integrated into many lessons. In either case, preview the entire video. You will need to make decisions on how to use it most effectively for your training. You can:
- Highlight a portion(s) of the CD/vide o rather than showing it in its entirety
- Ulse the Pre/Post teaching interviews during this session or save them for another time
- Reserve the CD/vide o to be shown again at a future time
- Ulse the CD/Video Modeling Observation Chart for the first vie wing and the Checklist in the Helpful Resources for additional vie wings.
```

\section*{SESSION ACTIVITIES}

\section*{Action Planning}
1. Encourage the participants to
follow the 3-step process to begin
teaching fluency in their classrooms tomorrow.
2. Read the 3 steps - Review, Revise, and Plan.
3. Give time for eacf participant to follow the plan.
4. Askfor questions.
```

F\&\mathcal{UENSCY}

1. Review: Lookover the notes you made during the Think-Ink-Pair-Share activities comple ted at the beginning of this session.
2. Revise: What additions or revisions can you make to your notes?
3. Plan: What are your next steps to incorporate fluency purpose fully into your le sson plans tomorrow?

How will those plans meet the instructional needs of your students?

Using the form on the next page, construct an action planthat will help you address the instructional needs of your students.
$\mathcal{A s}$ the participants are planning, roam around the room, providing assistance where needed. For example, give guidance to those who are having difficulty and provide feed

## $\mathcal{F L U E D N O}$

SECTION 5: SUOMMARV

## $\mathfrak{N O T E S}$ TO $\mathcal{T H E} \mathcal{F A C I L I T A T O R}$

This is the time for participants to summarize what they have le arned from these training sessions.

The participants will not do an exercise called a Synectics Searcfor a Simile. Tfis process involves constructing, comparing, and/or associating a mental image or picture of teaching fluency with other words, pictures, or experiences in the ir background knowle dge.

Synectics Search

1. Have the participants think about what te aching fluency is like.
2. Have them think about why it is like that.
3. The participants write their ide a in the blanks provided on the opposite page.
4. Share the ir ide as as a whole group.

# $\mathcal{S E C I O N} 5: \quad$ SUMMARV 

Synectics Search (Simile)

Summarize and document your key le arnings about fluency by completing the following statement:

Teacking fluency is like
because $\qquad$ .

This synectics process involves constructing, comparing, and/or associating a mentalimage or picture of teaching fluency with other words, pictures, or experiences in your 6ackground Knowle dge.

## $\mathfrak{N O} O \mathcal{T} S \mathcal{T O}$ THE $\mathcal{F A C I L I \mathcal { T A T O R }}$

After the summarizing activity, conclude your training session. Acknowledge the commitment that the participants have made to their students, classrooms, and themselves by taking the time beyond their already busy jobs to learn more. Celebrate with them that their learning is also important and that by putting aside the time to grow as educators, they are creating a healthy balance in their lives as they learn strategies that will benefit the ir students.

Finally, have the participants fill out an evaluation of the training before they leave. In the "Tips to Facilitating", there are suggested forms.

## Evaluation and Feedback

1. What did you find most usefulabout this session?
2. What did you find le ast useful?
3. What additional information, materials, or resources would be use ful?

# HELPFULL RES O URCES $\mathcal{N O T E S}$ 

##  <br>  --------------------

## $\mathcal{F L U E N} \mathcal{N}$

SECTION 6: HELPFULE RES OURCES

## $\mathfrak{N O T E S}$ TO $\mathcal{T H E}$ FACILITATOR

Section 6: He [pful Resources section is similar to an appendix. It consists of 2 sections - Checklist for Evaluating Instructional Materials and CD/Vide o Modeling Checklist. The Checklist for Evaluating Instructional Materials is a guide to assessing the content and uses of instructional aides. The CD/Video Modeling Checklist is a guide to watching the vide os for effective teaching behaviors. The Material and CD/Video Modeling Checklists are designed to be used at a later date. If a staff member wanted to reconvene, for example, and peruse its curriculum, it could use the Materials Checklist as a guide to the strengths and weaknesses of the classroom materials. In addition, as suggested in the Video Modeling subsection, a staff member may want to view the videos for this module over two or three separate occasions. The CD/Video Modeling Checklist offers additional observational categories and content.
This would be a good time to share Goodbye Round Robin Reading by Optiz and Rasinski, which has a variety of suggested texts to use for guided repeated reading activities.

Section 7: References
This section lists the resources cited within the manual. It can be used for additional searches or pursuing deeper research information.

Section 8: Glossary
The glossary included in this model speaks to the particular module that you are training.

Section 9: PowerPoint and Overtieads
This section exists only in the Facilitator's Manual of any module. It will help you organize overfead transparencies and/or PowerPoint slides for this training session.

Section 10: Tips to Facifitating
Like section 9, this section exists only in the Facilitator's Manual. It is a module in and of itself that contains the generalguidelines for facilitating a Re ading Links training session.

```

## FLIIENCY TERMS

| Term | Definition |
| :---: | :---: |
| $\mathcal{A c c u r a c y}$ | The percentage of words read without a deviation or miscue from the text; determined by counting the number of errors/miscues, subtracting that number from the total number of words in the text passage, and then dividing the number of words read correctly by the number of words in the text |
| $\mathcal{A}$ utomaticity | The ability to identify or spell words rapidly so that the literacy user's resources can be directed to comprefending and composing; quality of fluency; implies automatic levelor response with various tasks, such as the speed of retrie ving the sound of a specific letter; fluent processing of information that requires little effort or attention |
| $\mathcal{B} u d d y$ reading | Same as partner reading |
| Choral reading | Ulis on reading |
| Chunking | Grouping or phrasing thought units inste ad of focusing on single word-by-word reading |
| Decodable text | Text that follows typic al phonics rules |
| Expression | $\mathcal{A}$ me aningful manner of reading/speaking |
| Frustration level text | Text that is difficult or "too hard"for the reader; less than $90 \%$ success or more than 1 in 10 words miscued (Assessment should be based on accuracy and comprefiension.) |
| Independent level text | Text that is relatively easy or "just right" for the reader; a minimum of $95 \%$ success or no more than approximately 1 in 20 words miscued (Assessment should be based on accuracy and comprefension.) |
| Inflection | $\mathcal{A n y}$ change in tone or pitch of the voice (e.g., we signal a question with rising inflection.) |

$\mathcal{F}$ luency $\mathcal{T}$ erms notes cont.

| Instructional level text | Text that is challenging but manageable for the reader; a minimum of $90 \%$ success or no more than approximately 1 in 10 words too difficult (Assessment should be based on accuracy and comprefiension.) |
| :---: | :---: |
| Intonation | The system of significant levels and variations in pitch sequences within speecf |
| guncture | The transition from one speech sound to the next, either within a word or making the boundary betwe en words |
| Mentor reading | $\mathcal{A}$ more fluent reader reads aloud to or supports a less fluent reader by providing scaffolding |
| Paired reading | $\mathcal{A}$ fluent reader and a less fluent reader sit side by side and simultaneously read one text aloud |
| Partner reading | Paired students take turns reading aloud to eachother, often with a more fluent partner who provides a model of fluent reading, felps with word recognition, and provides feedback |
| Pfrase boundaries | The place where a natural oral reading break should occur in text |
| Predictable or patterned text | Rhythmic, repetitive language structures in children's literature and nursery rfymes |
| Prosody | The ability to read a text orally using appropriate pitch, stress, and juncture; to project the natural intonation and phrasing of speecfiupon the written text |
| Radio reading | Students "act out" or read texts as though it were a news story on the radio |
| Rate | The pace at which a reader reads a passage; the speed at which oral or silent reading takes place; the number of words in a passage multiplied 6y 60 and then divided by the number of seconds it takes a specific reader to read a specific passage |
| Read around | $S$ tudents read aloud to convey character's feelings and experiences, share favorite scenes, make connections, and prompt discussion |
| Readers Theater | The refe arsing and performing before an audience of a dialogue-rich script derived from a book |

$\mathcal{F}$ fuency $\mathcal{T}$ erms notes cont.
$\mathcal{F} \mathcal{L U E} \mathcal{N C Y}$
$\mathcal{R} \mathcal{A} \mathcal{D} I \mathcal{N G} L I \mathcal{N} \mathcal{K} S \quad \mathcal{P} \mathcal{A} \mathcal{R} \mathcal{T} I \mathcal{C} I \mathcal{A} \mathcal{N} \mathcal{T}$ 'S $\mathcal{M} \mathcal{A} \mathcal{N} \mathcal{U} \mathcal{A} L$

| Return sweep | The diagonal eye-movement from the end of one line of text to the start of the next |
| :---: | :---: |
| Shared reading | The teacher, tutor, or parent introduces the student or small group of students to a text and reads it to them. Then the students read the text with the teacher, tutor or parent. This is followed by the students reading the text to the teacher. Over the course of severaldays the students and teacher return to and reread the text, examine words and other features of the text, and engage in other extension activities based on the text. |
| Stress | $\mathcal{A}$ major marker in meaning; the emphasis from increased force of breath that makes a syllable, word, or group of words stand out |
| Tape-assisted reading | Students read along in their books as they hear a fluent reader read the book on an audiotape; reading aloud simultane ously or as an echo with an audio-taped model |
| Target rate | Rate or range of rates set as a goal or target for individual students |
| Timed reading | A process $6 y$ which individual students read orally for a designated amount of time, often in one-minute increments |
| Typograptical signals | Punctuation marks, large and bold print, underlining, and italics or any combination of these which help readers better understand an author's message |
| Word-by-word reading | Word calling; a halting, labored type of oral reading with a very slow rate of word identification, poor phrasing and comprefiension |
| $\mathcal{W} P$ M | Words per minute; rate of reading or speaking in terms of the average number of words covered in one minute |

## What is Fluency?

Fluency is:

- Reading with speed, accuracy and proper expression
- Without conscious attention
- While simultaneously constructing meaning

Children who are fluent readers can:

- Recognize words automatically
- Group words quickly to help them gain meaning from what they read, and
- Read aloud effortlessly and with expression

READING LINNKS PARIICIPANT'S MAXNUAL

WHAA IS FLUENCY OH \# 5

> Why Has Fluency Been $\mathcal{N}$ (eglected, Underemphasized, and Ignored?

Fluency fas been labeled the most

- Neglected reading skill
- Under-empfasized aspect of reading instruction

Because both researchers and practitioners assumed that fluency was the immediate result of word recognition proficiency.

READING LINNKS PARIICIPANT'S MANUAL
$\mathcal{W H Y} \mathcal{H A S} \mathcal{F L U E N C Y} \mathcal{B E E N} \mathcal{N E G L E C T E D}$ O H \# 6

## Why Is It Important for Students to $\mathcal{B e}$

 Fluent Readers?The $\mathcal{N A E P}$ assessment results for fourth graders indicated a high correlation between accuracy, rate, fluency, and scores on comprefension. Lowscores in fluency may mean difficulty in comprefension.

The $\mathcal{N}$ (ational Reading Panel (2000) concluded that there is a close relationsfip betwe enfluency and comprefinsion.

## Key Learning Goals

Participants will:

- Understand the connection betwe en fluency and reading development-especially as it relates to comprefension.
- Learn the differences betweenfluency and automaticity.
- Learn, model, and teach research-based strategies for fluency instruction in the classroom.
- Learn which phonemic awareness skills have the greatest transfer to reading.
- Learn to assess students'level of fluency, practice instructional strategies, and explore appropriate interventions.
- Create an action plan to apply keylearnings from this module to their classroom practice.

# What Does Oral Reading Fluency Look and Sound Like? <br> Oral reading fluency is characterized by 

- Smooth, expressive production
- Appropriate phrasing or chunking
- Rapid use of punctuation
- Determination of where to place emphasis or where to pause to make sense of text
(McGee GRicfgels, 2000 ; $\mathcal{N R P}$, 2000)

WHAT DO ES ORAL READIXNG FLUENCY LOO KAXD S O UNND LI KE? O H \# 11

## Why is Ffuency Important?

Fluency is important because it provides a bridge between word recognition and comprefiension.

While Fluency doesn't ensure comprefiension,
comprefiension is difficult without fluency. To
comprefiend texts, students must be able to:

- To decode fast enough and automatically enough
- To keep the content in sfort term memory so that meaning can be constructed

If a reader is stopping constantly to decode and figure out unknown words, the likelifood is that:

- meaning will be disrupted or
- the process will become long and laborious

What Are the $\mathcal{N a t i o n a l ~ R e a d i n g ~ P a n e l ' s ~}$ Findings about Fluency Instruction?

Fluency ins truction is most effective when in includes guided repeated oral reading.
 INS TRULCT I O $\mathcal{N}$ \# 13

## What $\operatorname{Did}$ the $\mathcal{N a t i o n a l ~ R e a d i n g ~ P a n e l ~ R e p o r t ~ S a y ~}$ About Guided Repeated Oral Reading?

The $\mathcal{N} \mathcal{R P}$ concluded that guided repeated oral reading:

- Is more effective than silent reading
- Has a significant positive impact on word recognition/accuracy, reading fluency, and comprehension (with feedback)
- Clearly impacts the reading ability of non-impaired readers through at le ast grade 4, as well as students with various reading problems throughout figh school
- Works well under a wide variety of conditions and with minimal special training
- Is effective (when used with guidance and feedback) in improving a variety of reading skills for good readers, as well as those who are experiencing difficulties
- Is equally effective with feedbackfrom teachers, parents and/or peers; however, children who are struggling the most might benefit from more skilled guidance

$\mathcal{W H A T} \mathcal{D I D} \mathcal{T H E} \mathcal{N A T I O N} \mathcal{A L} \mathcal{R E A D I N G}$ PANEL REPO RI S AY ABO UT GUIDED $\mathcal{R E P E A T E D} O R \mathcal{A} L \mathcal{R E A D I N G}$ ? OH\# 14

## Why Isn't Round Robin Reading an Effective Ffuency Strategy?

Round Robin Reading:

- Provides limited engagement
- Gives an inaccurate view of reading
- Promotes faulty reading frabits
- Invites inattention and disruption
- Gets in the way of effective strategies
- Consumes valuable classroom time that could be spent in more meaningful ways
- Causes anxiety and embarrassment
- Hampers listening comprefiension
 OH\# 15

## But Why Is Oral Reading Important?

Oral reading is important because it:

- whets students'appetites for reading
- encourages students to share and perform

- demonstrates fowspeaking, reading and writing connect with one another and impact our lives
- develops listening comprefension and vocabulary
- assists students in developing a range of reading skills (e.g., fluency, expression and correct pfrasing)
- promotes language learning
- Guilds confidence
- provides children with the additional reading time necessary for ongoing reading development
(Opitz שRasinski, 1998)
$\mathcal{B U I} \mathcal{W} \mathcal{H} \mathcal{Y}$ IS ORAL READI $\mathcal{N G}$ I MPO RTANTI O H \# 16

## What Does Effective Fluency Instruction Include?

- Ongoing assessment
- Modeling and explicit instruction
- Focus on automaticity and comprefension as goals
- Guided repeated reading experiences

- Word study
- Meaningful texts connected to the students'instructional needs and interests
o Encouraging students to read more (using approaches such as SSR $\mathcal{D E A R}$, Accelerated Reader) might be beneficial; however, existing research fas not yet demonstrated this in a clear and convincing manner.
o Although independent, recreation, sustained, silent reading and programs such as $\mathcal{A R}$ are not empirically supported to increase fluency, they may have
 instructional value in other areas.

What Are the Challenges for Teachers?
Teachers need to:

- Understand, choose, model, and use varied te acking and le arning strategies that show fluent reading is more than fast reading

- Design lessons requiring active participation
- Motivate students with energy, support, and positive reinforcement
- Match reading materials to students' instructional needs and interests
- Provide multiple opportunities for authentic repeated reading experiences
- Ulse classroom management strategies (e.g., small groups, partner reading) that increase each student's time on task.

## $\mathcal{F L U E N} \mathcal{N}$

 READING LINXS MODULLES

Tips to Facilitating the Reading Links Modules

This information may also be accessed as a separate LINXXS facilitator's manual.

## Introduction

The $\mathcal{L I N} \mathcal{N} K S$ training modules are designed to help teachers understand fow reading research can be put into practice in today's classrooms. Recognizing that teachers are the true change agents in education, these modules are intended for current classroom teachers and/or students pursuing teaching credentials.

This $\mathcal{L I} \mathcal{N} K S$ facilitator's module includes: a list of equipment and materials needed for the training session, room arrangement suggestions, and cooperative group procedures with a chart for cross-referencing to other $\mathcal{L I} \mathcal{N} \mathcal{K}$ modules. It is important to study and understand this section before beginning the training.

## ROPES Lesson Design

The $\mathcal{L I N} \mathcal{N} K S$ training modules use the $\mathcal{R O P E S}$ model as a framework for instruction. The ROPES framework provides a lessondesign Known to promote the acquisition and retention of new le arnings. The following le sson design will help guide you as well as your participants.

The following is a diagram of your training plan.

| $\mathcal{R}$ | Review - or affective entry le arning de signed to activate prior <br> Knowle dge and to focus the session. |
| :--- | :--- |
| O | Overview - explicit articulation of the goals and objectives of the <br> training |
| $\mathcal{P}$ | Presentation - concepts and information that are needed to achieve the <br> Lesson objective are provided |
| $\mathcal{E}$ | Exercise or Practice - activities that demonstrate the understanding of <br> the content are practiced |
| $\mathcal{S}$ | Summary - action planning into specific plans for classroom use |

Dr. Robert Carkfuff designed the ROPES model.

## Equipment and Materials

The following equipment and materials sfould be gathered and in place prior to beginning the training:

Equipment (make sure these are in working order before you begin)

- Overfiead projector
- Laptop computer (or other computer) with compact disc player and means to project for large group vie wing
- Overfiead screen
- Extension cords (if needed)
- Timer (an overfiead timer is desirable)
- Tape recorder (for Fluency Module)

Materials

- Overfead transparencies (These are supplied in 6lackline form and you will need to make them into transparencies.)
- Training manuals (one for eacf participant and a fewextras)
- Name tags
- Fine point pens for name tags
- Chart paper
- Chart pens
- Overfiead pens
- Masking tape or other sticky medium for fanging chart paper on walls
- 3 "x 5 " lined cards or cut paper for making notes and submitting que stions to trainer

## Optional(but appreciated)

- Coffee, water, snacks
- Signs in the building directing participants to the training room
- Attendance sign-in sfieet (required by some districts)
- Copies of training compact discs (one for each participant)
- Large version of agenda witf breaks noted

## Workshop Expectations

Trainers need to establisf some simple group expectations at the beginning of the worksfop. This should be done quickly and in an upbeat manner.
"We want your training to be meaningful and worthwhile. To ensure the success of this workshop for all participants, we 'd like you to commit to the following."

Sample list of expectations:

- Everyone will participate; group tasks are followed and carried out
- Stay on task witf the group; please refrain from correcting student work, doing needlework, or talking while others are talking
- If you need to communicate with your neighbor, pass notes instead of visiting
- Be respectfulto eacf participant
- Keep on the main area of focus - don't take the group off track
- Disagree agreeably
- Turn off cell phones and pages or switcf to text messaging

## Number of Participants

Although you may fave no choice in this matter, $16-35$ is the recommended number of participants for maximum efficacy.

## Time Allotments

The agenda for each $\mathcal{L I N} \mathcal{N} K S$ module will include approximate times. "Housekee ping" items such as passing out materials, filling out registration and clock four forms, and 6 rief breaks may increase your time frame.

The size of your group may influence the length of time youneed to complete each module. Larger groups may require more time for group processes.

## Room Arrangement

Many room arrangements are workable. The room arrangement sfould allow all participants to view the overfiead and computer projection as well as process the ne w le arnings in cooperative groupings.

When planning your classroom arrangement, make sure no participants fave the ir backs to you or your visuals. Walk around the room to see what the participants will be able to see from various seats.

The best arrangements also allow for participants to interact easily with one another. Leave space for the trainer to circulate around the room and interact with each participant. This is especially important when the trainer monitors participants for understanding.

Groupings of 4-6 work best.

## Cooperative Group Procedures

$\mathcal{B r a i n}$ researcf states new learning is remembered if it is broken into small, meaningful units and actively processed in some manner.

Cooperative le arning group procedures help participants take new le arnings and process them.
"When the classroom is structured in a way that allows students to work cooperatively on le arning tasks, students bene fit academically as well as socially" (S lavin, 1982 ).

Whengroup procedures are used, be sure to give clear, specific directions and the reason why the procedure is being used.

The following cooperative le arning procedures will also be embedded in your facilitator's script.

LINKK Project

Iigsaw (modified for $\mathcal{L I N} \mathcal{N} K S$ module $s$ )

This procedure is used when there is a lot of material to cover and not much time. The participants each take one piece of the material, le arn it, and then share the learning with the others in the group.

1. Each participant is given a specific task, reading selection, te aching strategy, or new le arning to practice.
2. Each participant practices untilhe or she is able to teach the concept to the group.
3. The participants thenteacheachother the new learnings. Everyone in the group should know all the le arnings at the end of the jigsaw.

## Siterature Circles

This comprefension strategy is used to promote interest in reading and book discussion.

Participants read the same story or book. Group roles and responsibilities are assigned. Discussion rules are also outlines. Discussion is centered on the text and each participant's interpretation of the text. Leadersfip of the group may vary.

## Partner or Paired Reading

This fluency and comprefension strategy is used with two students or one student and one adult.

Partners sit next to each other. The first student reads orally as the other partner reads along silently giving support if a word is miscued. The first student stops at a predetermined spot, usually after a paragraph or two fas been read, and retells/discussed the text.
$\mathcal{A}$ variation of this strategy is to have 6 oth partners read together. As soon as the first student is comfortable, a signal(such as a tap on the table) is given and the second partner drops out. The second partner gives support if the first student miscues on a word. Then the students read in tandem again until the first student gives the signal again for the second student to follow along silently.

## 3-Minute Partner Review

This is an ideal way to process newinformation with a partner.

1. Partners take turns sharing what they have le arned so far by reviewing the ir notes.
2. The first partner starts by orally reviewing for $1 \not 1 / 2$ minutes (use your timer fiere).
3. The second partner orally revie ws for 45 seconds and cannot re pe at anything the first partner said.
4. The first partner orally reviews for 30 seconds adding only ne winformation.
5. The second partner finishes by orally revie wing for 15 seconds. Again, only adding ne winformation and not repeating anytfing previously stated.
6. At the end have the pair write down any questions they still fave on a 3 " $x 5^{\prime \prime}$ card. Cards are submitted to the facilitator.

## Reciprocal Teacfing

This comprefension strategy is used for small groups or whole class discussions.

The facilitator takes turns with the participants being "teacher." Reading text is divided into sections, usually paragraphs. The "teacher" asks the group to respond to the text section. Participants are asked main ide a questions, to summarize what fias just been read, to make predictions, and to clarify any unclear sections of the text. The "teacher"and other participants give feedback. After each section of text has been discussed, another "teacher"is chosen to lead the discussion.

Think-Ink-Pair-Share

Participants have a chance to think of their own answers, reflect with a partner, and then share with the group.

1. The trainer poses a question or topic to the group.
2. Eack participant (working individually) takes a specified amount of time (usually 1-3 minutes) to "think" and write a response.
3. After the time has elapsed, participants "pair" with another person at the table and discuss the question or topic and their responses.
4. Pairs then"share"with the rest of the participants at the ir table.

Variations of Think-Ink-Pair - Share

## Filling the $\mathcal{H e}$ ad

In this variation, two participants worktogether to think, share with another pair, thenshare with the group. This strategy involves a concept mapping strategy called the $\mathcal{F r a y e r} \operatorname{Modelof~Concept~} \mathcal{A}$ ttainment (Frayer, Frederick, \& Klausmeier, 1969). Participants form pairs and comple te a concept map together. After each pair has completed the ir concept map, they share the ir work with another pair. Individuals or pairs then share with the whole group.

## Participant Engagement

Participants are asked to extend the le arning by completing a "think sheet" and thensharing responses with a partner, and/or with the small table group, and/or the whole group.

## Synectics Search (Simile)

For this activity, participants use a synectics process to summarize key learnings. This synectics process involves constructing, comparing, and/or associating a mental image or picture of a concept with other words, pictures, or experiences in their Gackground Knowledge. Participants complete a simile on their own and share with a partner or with the whole group.

Example:
$\qquad$ is like $\qquad$ Gecause $\qquad$

## Word Sort (Categorization)

Participants are asked to lookover a list of words critical to an area of study. Words are then sorted into categories. Participants are asked to share their lists with a partner. This activity can also be extended to sfiaring with the small table group and/or the whole group.

## Comparative Thinking

This activity is similar to "Word Sort." It is used as a summarization of new learnings. With a partner, participants reflect on their new Le arnings and sort critical words into categories. Comparisons are made as to what was already known be fore the module and what was le arned. Participants share with the small table group and/or the whole group.

## Dealing witf Change

Sometimes when newinformation is presented to veteranteachers, misperceptions may develop (e.g., some people may think that if the new information is different from their past practices in teaching, they've been doing things "wrong"). Teachers deserve respect and support for what they fave already contributed to education and what they will become as educators.

During a worksfop, "treat the past with respect. Frame whatever is passing as useful to what you are moving toward. Remember that people may identify with past practices in a positive way. Never demean the old way of doing things" (Garmston, 1997).

Kee ping this in mind, though, part of your job as a facilitator is to establish a need to make pedagogicalchanges among participants $6 y$ providing specific, researchbased information to effect and support that change.

Formula for Helping Teachers Change
Training can be a toolfor felping change instructional practice.
This formula for change has been built into the structure of this module.

$$
\mathcal{D} \notin \mathcal{V} \notin \mathcal{F} \notin S>\mathcal{R} C
$$

$\mathcal{D}=\operatorname{DISSAIIS} \mathcal{F A C I I O N}-\mathcal{H e}$ [p teachers discover dissatisfaction with where they are today
$\mathcal{V}=\mathcal{V} I S I O \mathcal{N}$ - Give teachers a good picture or vision of what researched- Gased Reading strategies look like
$\mathcal{F}=\mathcal{F I R S T} \mathcal{S T E P S}-\mathcal{H e}[p$ teachers discover specific reading instructional strategies that will help move toward the vision
$S=S$ UPPPO RI - Provide follow-on support and systems to help manage the journey in their classrooms
$\mathcal{R C}=\operatorname{RES}$ IS TANCE TO CHANGE-As a trainer you must work on building this side of the equation ( $\mathcal{D} \not \subset \mathcal{V} \notin \mathcal{F} \not \subset \mathcal{S}$ ) in order for teachers to break through the ir inertia, fear of change, Garriers etc. that would impede their progress toward the vision

## $\underline{\text { Less is More }}$

The LINNKS training should be "te acker friendly" and include the salient points of reading acquisition. Too much information in one session can be overwhelming.

De Four and Eaker (1998) emphasize in Professional Learning Communities at Work, "While there is no single way to eliminate nonessential content, it is difficult to overstate the significance of the task" (p. 166).
$\mathcal{A s}$ facilitators, we know the vastness of the knowledge base in reading. The LINXKS modules emphasize only the most essential elements.

## Modeling

Many of the good teacking practices you incorporate into your training of teachers may be generalized for use by teachers with their own students.

Remember to model all new practices. "I do it, we do it, you do it" (Anita Archer) is a simple way to explain this idea. Always modelfor the students using exemplary practice and procedures. Continue by practicing together-teacher and students Gefore expecting students to perform independently. In the training sessions, the teachers are your students.

Theory, suggest goyce and Showers (1980), provides increased conceptual control and rationale; however, it is with the addition of modeling and practice that mastery is acquired. Feedback and reflection regarding the newlearning change behaviors over the long term.
